SUMMARY

Final-year CS student with strong Python skills and hands-on experience building automated validation pipelines, REST APIs, and monitoring dashboards. Proficient in Python. Familiar with Selenium fundamentals and currently exploring Appium for mobile automation.

EDUCATION

Vellore Institute of Technology (VIT), Bhopal
B.Tech in Computer Science Engineering

2023 – 2027
CGPA: 8.54 / 10.0

PROJECTS

Automated Data Ingestion & Validation Pipeline | *Python, FastAPI, PostgreSQL, Streamlit, SQL* 🌐 Code

- Built a **Python-based ETL pipeline** ingesting and **validating 1000+ server log records** with automated deduplication, normalization, and quality scoring directly mirroring catalog metadata validation workflows.
- Authored **automated SQL validation queries** tracking error rates, retention anomalies, and P95 response times; surfaced failures and triggered alerts for prompt remediation.
- Developed a live **Streamlit monitoring dashboard** visualizing pipeline health metrics in real time, reducing time from failure detection to actionable insight to under 2 minutes.
- Documented data contracts, validation logic, and schema design for cross-functional handoff analogous to change request documentation in CI workflows.

CI Pipeline Health Monitor | *Python, GitHub Actions API, Logging*

🌐 Code

- Built a **Python monitoring script** that polls the GitHub Actions API to detect workflow failures, logging run status, failure timestamps, and error context for prompt triage.
- Implemented **automated failure alerts** with structured logs, reducing mean time to diagnose broken pipeline runs.
- Designed the tool to be **CI-agnostic**, with configurable polling intervals and repo targets applicable to any automation pipeline monitoring workflow.

AutoQA Test Suite | *Python, Selenium, pytest, GitHub Actions*

🌐 Code

- Built a Selenium + pytest web automation suite covering navigation, metadata validation, and UI state verification for web applications.
- Integrated **GitHub Actions CI** to trigger test runs on every commit and generate **pytest-html** failure reports for prompt triage.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Test & Automation: Selenium, Appium, REST API validation, CI pipeline monitoring, Postman

Data & Analytics: PostgreSQL, ETL Pipelines, Streamlit, Power BI, Data Visualization

AI / ML: Scikit-learn, TensorFlow, Keras, LLM Integration (Gemini, OpenAI)

ACHIEVEMENTS

Top 10 Finalist — IIC Hackathon | *Ranked in top 10 out of 250+ competing teams*

CERTIFICATIONS

Oracle Certified Professional — Java SE 11 Developer (1Z0-811)

Issued 2024

NPTEL — Introduction to Machine Learning | *IIT Madras*

Issued 2025
